

Joy Ndanu

AI/ML Engineer & Frontend Developer

Nairobi, Kenya • joy.ndanu@email.com • +254 700 000 000 • github.com/joyndanu • linkedin.com/in/joyndanu

PROFESSIONAL SUMMARY

Results-driven AI/ML Engineer and Frontend Developer with 3+ years of experience building intelligent systems and responsive web applications. Passionate about bridging the gap between machine learning research and production-ready software. Experienced in deploying ML models, designing intuitive user interfaces, and working across the full development stack.

TECHNICAL SKILLS

AI / ML: Python, TensorFlow, PyTorch, Scikit-learn, Pandas, NumPy, Hugging Face, LangChain

Frontend: React.js, Vue.js, Vite, Tailwind CSS, HTML5, CSS3, JavaScript (ES6+)

Backend: Node.js, Express.js, FastAPI, REST APIs, GraphQL

Databases: MongoDB, PostgreSQL, MySQL, Firebase

DevOps & Cloud: Docker, Git/GitHub, Google Cloud Platform, Vercel, Render

Other: JWT Auth, Socket.io, Prompt Engineering, Data Visualization

WORK EXPERIENCE

AI/ML Engineer Intern

TechVentures Africa • Jan 2024 – Present • Nairobi, Kenya

- Developed and deployed a document classification model achieving 92% accuracy using BERT fine-tuning.
- Built a recommendation engine using collaborative filtering, improving user engagement by 35%.
- Created data pipelines using Pandas and NumPy to preprocess 500K+ records for model training.
- Integrated ML models into REST APIs using FastAPI, consumed by React frontends.

Frontend Developer (Freelance)

Self-employed • Jun 2022 – Dec 2023 • Remote

- Designed and built 10+ responsive web applications for clients across e-commerce, fintech, and education sectors.
- Developed reusable React component libraries reducing development time by 40%.
- Integrated M-Pesa Daraja API (STK Push) for payment flows in client projects.
- Collaborated with backend teams to design and consume RESTful APIs.

PROJECTS

JobHub — Full-Stack Job Platform (React/Vite, Node.js, MongoDB, Socket.io, JWT)

End-to-end job platform with real-time notifications, employer/seeker dashboards, job listings with filters, and application tracking.

AI Habit Coach Chatbot (Claude API, Python, Prompt Engineering)

Conversational AI habit coach using Claude's API with custom prompt engineering for personalized coaching sessions.

Vehicle Tax Valuation System (React, Node.js, PostgreSQL)

Full-stack system built during KRA internship to automate vehicle tax valuation, replacing a manual process.

Smart Match Portal (Vue.js, Express, MongoDB)

Intelligent candidate-job matching portal with ML-powered ranking and bilingual English/Kiswahili support.

EDUCATION

Bachelor of Science in Information Technology

Kabarak University • Graduated 2023 • Nakuru, Kenya

- Relevant coursework: Machine Learning, Data Structures, Database Systems, Software Engineering, Computer Networks.

CERTIFICATIONS & LEARNING

- Google Women in Tech (WeTech x Google) — AI Engineering Track
- TryHackMe — Linux & Cybersecurity Fundamentals
- Safaricom Decode 4.0 — Agentic AI & Emerging Tech
- AWS Cloud Practitioner Essentials (in progress)
